

CORES HAN 1.6 Release Notes

These notes describe highlights of the CORES HAN 1.6 release scheduled for Thursday, December 9, 2021. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

Documents

Usability improvements to the Documents page make it easier to locate files and file details. In addition to the name of a folder or file, you now see the date it was last modified, the name of the owner, and a yellow flag on files that have been checked out.

 alerts.webp Checked out	12/6/2021, 10:59:41 AM	Proprietary Representative (JUVARE)

Registration

Now, when people register through your CORES HAN solution, you can choose to make it a requirement that they select at least one organization. This feature can be enabled or disabled, as necessary.

Footer Message

Configured through Settings, you can now create and manage a default message that appears as the footer on all new inbox, email, and fax notifications and templates. The default message is visible and can be updated when you are creating or editing a notification in the rich text message editor.

Resolution

An issue that prevented *pending* organization members from being found on the membership list has been resolved.
