DesignStudio 1.6 Release Notes

These notes describe enhancements introduced in the DesignStudio 1.6 release scheduled for Tuesday, July 12, 2022. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

DesignStudio

Temporary Accounts

As an administrator, you can now create temporary accounts that allow people to log in to and use your solution for a limited period.

Rich Text Component

On input views, you can now use the Rich Text component to customize the look and feel of content by indicating the font size, color, styling, alignment, and bulleting.

Toolbox Menu

On input views, you can use the new Toolbox components to automatically populate input fields when the data is inserted and/or updated.

Enhancement

Several improvements were made to enhance the overall performance of the solution.

DesignStudio Pro

Form Sharing

The forms you create in DesignStudio can now be quickly imported and exported to facilitate information sharing and knowledge transfer.

Automatic Form Creation

Now, you can create a form based on a board's input view. This feature converts board entry fields into form intake fields.

Usage Report

On the Settings page, through Submission Reporting, you can generate the new Usage Report to check usage statistics for a better understanding of how your boards and forms are being used.
