# DesignStudio 1.7.1 Release Notes

These notes describe enhancements introduced in the DesignStudio 1.7.1 release scheduled for Wednesday October 12, 2022. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

Enhancements and Resolutions

- On the Field Set Settings window, conditional statements now generate an easy-to-read logic statement compiled from field choices. For example, the first field (previously a true/false option) now indicates whether the component is visible or hidden. Additionally, the full statement is presented below for validation purposes.

- Several user interface (UI) enhancements were made to help you successfully complete board and form configuration.

- An issue that prevented the creation of a DesignStudio account on more than one environment was resolved. You can now create accounts using the same email address on more than one environment if necessary.
