

EMResource® 4.10 Release Notes

These notes describe highlights of the EMResource 4.10 release scheduled for Wednesday, May 3, 2023. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

Login Email Updates

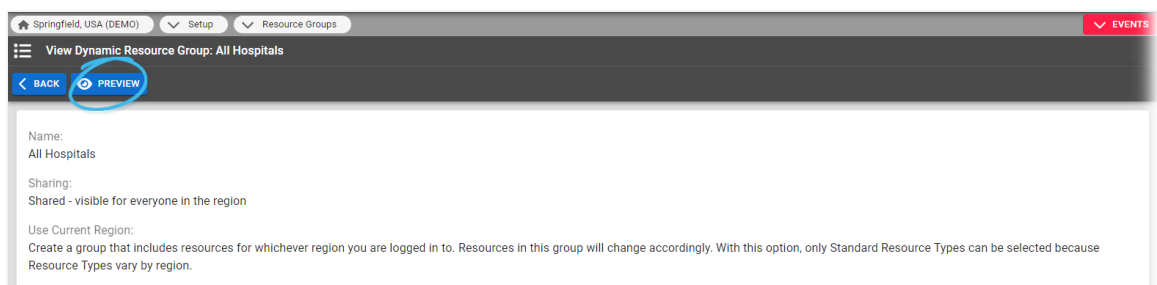

In compliance with security best practices, user login emails can no longer be edited by Regional Administrators. Users can continue to edit their own login email address through the main menu by selecting Preferences > User Info or by clicking their name in the upper right and selecting My Profile.

Resource Groups Page Layout and Management

Several enhancements were applied to the Resource Groups page to help you quickly view, create, copy, edit, and delete static and dynamic resource groups based on your permissions.

When viewing Dynamic Resource groups:

- A preview button now appears on the left, allowing you to view the list of resources in this group. A back button also appears on the left.

When viewing Static Resource groups:

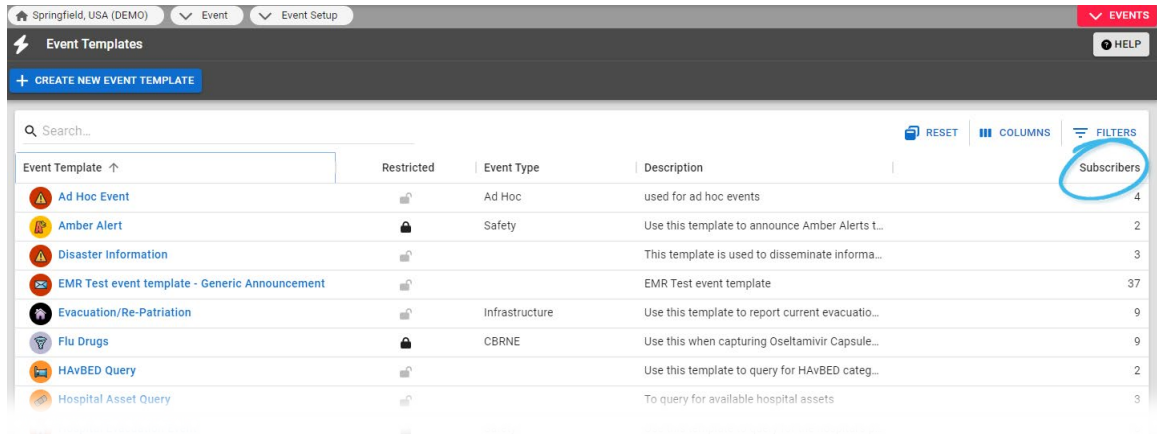

- When selecting Regions and Resources, a targeted search bar appears on the left to help you quickly find specific data. Meanwhile, the Column and Filter options are located on the right.
- With appropriate permissions, action buttons, including Edit, Copy, and Delete, now appear on the left.

For more information about this feature, go to the Help Center article [Resource Groups](#).

Enhancements

- On the Event Template page, a new column on the right displays the number of users subscribed for event notifications related to that template.

Event Template	Restricted	Event Type	Description	Subscribers
Ad Hoc Event		Ad Hoc	used for ad hoc events	4
Amber Alert		Safety	Use this template to announce Amber Alerts t...	2
Disaster Information			This template is used to disseminate informa...	3
EMR Test event template - Generic Announcement			EMR Test event template	37
Evacuation/Re-Patriation		Infrastructure	Use this template to report current evacuatio...	9
Flu Drugs		CBRNE	Use this when capturing Oseltamivir Capsule...	9
HAvBED Query			Use this template to query for HAvBED categ...	2
Hospital Asset Query			To query for available hospital assets	3

- The Resource List page now includes County, Standard Resource Type, and Shared columns. AHA ID and Common Facility ID (identifiers used to link EMResource facilities to facilities in other Juvare solutions) are hidden by default for readability. They can be shown by selecting them in the “Columns” menu. Additionally, filtering is simplified with County, Standard Resource Type, and Resource Type selection in the Filters menu.
- Now, when you generate reports in EMResource, the resulting Excel spreadsheet automatically adjusts row height and column width so that information fits appropriately. Additionally, date and time fields can be sorted, and header rows are pinned to the top of the spreadsheet so you can continue to view this info while you scroll.
- The speed of delivery and throughput of notifications was improved.
