

EMResource® 4.13 Release Notes

These notes describe highlights of the EMResource 4.13 release scheduled for Wednesday, July 19, 2023. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

Dashboard Updates

The *Dashboards* page was updated, providing all the same features in a new layout that enhances your ability to locate and consume important information about resource statuses. The main changes include:

- Now, when accessing your dashboard through the *View Dashboard* option, all dashboards are configured with the same 12-column layout.
- Previously called gadgets, the dashboard components that contain resource information are now called widgets, and they can span any number of columns in width.
- The **Add Widget** and **Manage** options are now located on the left.

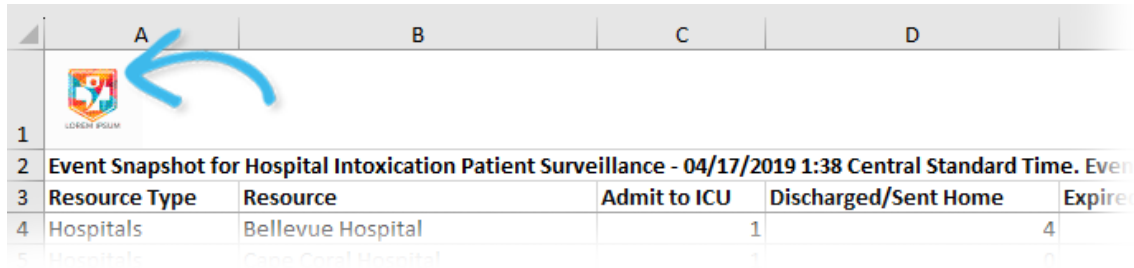

- When adding a widget, a search bar now appears in the *Available Widgets* window to help you find the type of widget you want to create.
- By cloning an existing widget, administrators can now use it as a "template" for a new widget.

Logo on the Event Snapshot

Administrators can now add a logo to the region's Event Snapshot report through the *Setup Regions* page. After uploading the logo, it will appear on the Excel version of the Event Snapshot report every time it is generated. This feature will be available for additional reports in the next release.

	A	B	C	D	E
1					
2	Event Snapshot for Hospital Intoxication Patient Surveillance - 04/17/2019 1:38 Central Standard Time. Event				
3	Resource Type	Resource	Admit to ICU	Discharged/Sent Home	Expired
4	Hospitals	Bellevue Hospital	1	4	
5	Hospitals	Cape Coral Hospital	1	0	

Resolutions

- An issue with sorting date and time columns in Excel reports was resolved. Now, columns are sorted by date and time, as expected.
- An issue that prevented you from scrolling very long lists in the *Move Document* window was resolved.
- In the *Notes* section of the *Detail View*, an issue that caused the map to not display properly with large amounts of text was resolved.
- An issue that prevented the delivery of some monthly reminder emails was resolved.
