

EMResource® 4.7 Release Notes

These notes describe highlights of the EMResource 4.7 release scheduled for Wednesday, January 18, 2023. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

Single-User Import Option No Longer Available

As part of the final stages of migration to Juvare Login Services, the single-user import option that allows you to copy account information from one Juvare solution to another is no longer available.

Now, you must add the new user account information to each Juvare solution your organization uses. These accounts are then linked based on the login email, and the user can access them through the Juvare Login Services dashboard.

Account Reactivation

When you reactivate a user account, the account is now automatically migrated to Juvare Login Services. As a result, you must add a login email and, if the user does not have an account in another Juvare solution, the account activation process initiated through the welcome email must be completed.
