

Juvare Alerts 6.0 Release Notes

These notes describe highlights of the Juvare Alerts 6.0 release scheduled for Wednesday, December 6, 2023. More information is available through the help in your solution or by contacting Juvare Support at 877-771-0911 or support@juvare.com.

New Local Admin Role

A new system role called Local Admin was introduced, offering the same permissions as an Organization Admin with the added benefit of being able to manage accounts across organizations as well as view the *Organization History* and *Group History* pages.

Accounts Table

The Accounts table was updated to display the Account Status for each record, add new filters, and improve existing filters. On the *Accounts* page, the new filters are System Role and Account Status. On the *Organizations* page, the new filters are Organization Role and Organization Status. When filters are applied on the *Accounts* table, they persist when you view accounts and then navigate back to the table. Also, these filters can now be deselected individually.

Accounts Filter

On the *Accounts* page, several filters were added to help you locate accounts quickly. The new filters include:

- Last Login Date
- Last Updated Date
- Last Registered

File Library

The *Documents* page was renamed as the *File Library* to better convey the purpose of the feature since you can store and host a wide variety of file types, from video and audio clips, images, spreadsheets, and Adobe® PDFs to Microsoft® Word® documents.

Contact Us Form

- Now, when you use the *Contact Us* form, a confirmation message displays after you send the request, and clicking OK on that message refreshes the form.
- A new setting called *Contact Us Admin Email Address* allows Client Admins to configure the email addresses to which *Contact Us* emails are sent.
