

WebEOC® ECM Email Importer 1.6 Release Notes

These notes describe enhancements introduced in the ECM Emails Importer 1.6 release scheduled for Monday, July 11, 2022. More information is available through the help in your solution or by contacting the Juvare Support Center at 877-771-0911 or support@juvare.com.

Server Authentication

The options for authenticating access to your email server were expanded. Now, in addition to basic authentication, Microsoft Office 365 OAuth 2.0 Authentication is available.

A screenshot of the 'Email Import Settings' form. The form has a title bar 'Email Import Settings' and a section header 'Email Server Credentials'. It contains several fields: 'Authentication Method' is a dropdown menu set to 'OAuth 2.0 (Microsoft Exchange Online)'; 'Client ID' is an empty text box; 'Tenant ID' is an empty text box; 'Scopes' is a text box containing 'openid offline_access email https://outlook.'; 'Token' is a green button labeled 'Acquire'; 'Server' is a text box containing 'outlook.office365.com'; 'Port' is a text box containing '995'; 'Username' is an empty text box; and 'Enable SSL' is a checkbox that is currently unchecked.

Email Import Settings	
Email Server Credentials	
Authentication Method	OAuth 2.0 (Microsoft Exchange Online) ▼
Client ID	<input type="text"/>
Tenant ID	<input type="text"/>
Scopes	openid offline_access email https://outlook.
Token	<button>Acquire</button>
Server	outlook.office365.com
Port	995
Username	<input type="text"/>
Enable SSL	<input type="checkbox"/>

Resolutions

An issue in which new emails were not added to the board when it had too many records was resolved. Now, all new records are stored in the board even when it contains over 200K records.
